## B.SC HOME SCIENCE - PART II

## SCHEME OF EXAMINATION

The number of papers and the maximum marks for each paper together with the maximum marks required for a pass course are shown in the scheme of examination against each subject separately. It will be necessary for a candidate to pass in theory as well as practical part of a subject paper, wherever prescribed, separately. Classification of successful candidates shall be as follows:

First Division 60%

of the aggregate marks prescribed in honors and subsidiary subjects of Pt.I. Pt.II and Pt.III examination taken together.

Second Division 48%

of the aggregate marks prescribed in honors and subsidiary subjects of Pt.I. Pt.II and Pt.III examination taken together

# The theory examination paper will consist of three parts:

- 1. Part I will comprise of 10 very short answer questions of 2 marks each. The answer to each question must be within the limit of 20-40 words.
- 2. Part II will comprise of 5 short answer questions of 4 marks each. The answer to each question must be within the limit of 50-60 words.
- 3. Part III will comprise of 6 long answer questions (essay type) of 20 marks each with internal choice in each question. Candidate will need to attempt only 3 questions.

Max Marks: - 50 marks

Teaching workload: one practical/week (2 hours/practical)

Total teaching workload: 24 practicals/batch

Objectives:

1. Students will gain insight into the growth patterns, developmental characteristics and activities of children in a practical situation.

2. They will also learn to understand significant issues related to adolescents, adults and ageing people.

Co	Contents: Practic	
1.	Study of the reflexes of new born in child clinics.	4
2.	Anthropometric measurement of children from birth to 6 years. Plotting and interpretation of data as per WHO norms.	4
3.	Planning. Preparation and conduction of developmentally appropriate activities to enhance overall development of children physical, another language, cognitive, social and emotional (AV aids).	. <b>S</b>
4.	Focus group discussion with adolescents to understand their aspirations, educational and career choices.	4
5.	Preparation of a brief questionnaire to identify the problems faced by adults and aging people in communities. Report the information as individual case profile.	4

## **Examination Scheme**

Major Problem - Preparation of aids

10 marks

Minor Problem -

Pletting and interpretation of data on group

5 marks

Recognition of reflexes

5 marks

Preparing Questionnaire Viva

5 marks 5 marks

20 marks

NUTRITIONAL BIOCHEMISTRY (THEORY - IX) Max Marks: - 100 marks

Teaching workload: 4 hours/week

Total teaching workload: 96 hours/year

#### **Objectives:**

UNIT I

This course will enable the students to -

Develop an understanding of the fundamentals of biochemistry.

2. To understand the biochemical process and systems as applicable to human mutration.

Introduction to Nutritional Biochemistry:

Hours

Definition and Objectives

University of Rajusthan JAIPUR

	Scope of Biochemistry: knowledge of electron : protein : neutron : atomic	
	number, atomic weight, valency, structure of carbon, pH, buffer, normal and	
	molar solutions	
	Role of Biochemistry in clinical nutrition.	10
	Carbohydrates	10
•	Definition, composition and classification of Carbohy drates.	
	Functions, Deficiencies and Sources.	
	General properties of monosaccharides, disaccharides and polysaccharides:	
	exidation reduction, acetylation, inter conversion, reducing property, osazone	
	formation.	
,	Digestion and Absorption.	
3.	Lipids	8
	Definition and classification of lipids.	
	Functions, Deficiencies and Sources.	
	Important properties of fats: Hydrogenation, halogenation, lodine number .	
	rancidity, acid number.	
	Types and properties of fatty acids, essential and non essential fatty acids.	
	Types and importance of phospholipids, glycolipids and cholesterol.	
	Digestion and Absorption.	
4.	Proteins	11
	Definition: composition and classification of Proteins	
	Functions, Deficiencies and Sources.	
	Essential and Non essential Amino acids.	
	Quality of protein, supplementary value of protein.	
	Methods used in determining Quality of proteins – PER, NPU, BV, and	
	Nitrogen Balance.

INTERIOR SPACE DESIGN (PRACTICAL-X)

Max Marks: - 50 marks

Teaching workload: one practical/week (2 hours/practical)

Total teaching workload: 24 practicals/batch

**Objectives:** 

1. Know the various materials used in construction.

Dy. Registrar
(Academic)
University of Rajasthan
IAIPUK

- 2.Gain knowledge in principles of planning various types of residential space.
- 3. Be able to top choose furnishing material keeping the financial consideration in mind
- 4. Gain knowledge on furnishing; develop the skills of drainage, house plans and furniture layouts, creating design for furnishing items.

Contents: (one class-practical)

- 1. Market survey on material used in interiors window
- 2. Market survey on material used in interiors door
- 3. Market survey on material used in interiors roof
- 4. Market survey on material used in interiors Ceiling.
- 5. Market survey on material used for kitchen & modular kitchen
- 6. Drawing types of door and window and their treatments
- 7. Drawing of roof- ceiling & Flooring types
- 8. Drawing types of furniture for various rooms
- 9. Flower arrangement: fresh arrangement
- 10. Making artificial flowers
- 11. Flower arrangement: dry arrangement
- 12. Making a Decorative article using any waste material like Vase, flowers & others
- 13. Introduction to types of Furnishing. Accessories and lighting
- 14. Drawing of standard kitchen plan
- 15. Planning different types of kitchen- L- shape, one wall. U- shape and two wall kitchen
- 16. Developing three dimensional plans of kitchen with storage unit- L shape and one wall
- 17. Developing three dimensional plans of kitchen with storage unit- U shape and two wall
- 18. Interior space planning for different areas of a house in terms of colour, furnishings, furniture arrangement, window treatments, floorings, ceilings, accessories, lighting-Bed room and children's room
- 19. Interior space planning for different areas of a house in terms of colour, furnishings, furniture arrangement, window treatments, floorings, ceilings, accessories, lighting-Living room and dining room
- 20. Interior space planning for different areas of a house in terms of colour, furnishings, furniture arrangement, window treatments, floorings, ecilings, accessories, lighting-Study room and drawing room
- 21. Architectural model (three dimensional) of various rooms along with layout of interiors bed room and children's room
- 22. Architectural model (three dimensional) of various rooms along with layout of interiors-Living room and dining room
- 23. Architectural model (three dimensional) of various rooms along with layout of interiors-study room and drawing room
